- Used **AJAX** to call the APIS and display them on the browser.
- Manipulated data using **CRUD operations of MySQL** database management system and handled database access and data transmission based on Restful web service.
- Used Redux along with Thunk middleware for global state management in React application

Professional Experience and Projects

Company: Adison Infotech, UK, London

Project: EHR & Practice Management Software

Role: Frontend Developer

Client: Nextech

Duration: June 2020-Aug 2022

Website: <https://www.nextech.com/>

Project Description: EHR: Increase charting efficiency and improve documentation accuracy with the #1 Ophthalmology-specific EHR, IntelChartPRO. Designed for Ophthalmologists by Ophthalmologists, IntelChartPRO intuitively mirrors your practice's problem-driven workflows, allowing you to see more patients, improve the quality of care, and eliminate after-hour charting. Practice Management: Reduce administrative burdens, optimize financial performance, and enhance patient care with a robust Practice Management solution designed to support the changing needs of the Ophthalmology practice.

Key Deliverables:

- * Worked in an agile environment on the development of **UI/UX designs**.
- * Aligned with the product management to make sure the latest updates and new functionalities are being tested.
- * Designing front end using **React and TypeScript**
- * Creating Modular responsive templates using modern **CSS, Bootstrap, and JavaScript Libraries**.
- * Ensure efficient **web development by supporting designers and developers**.

- * Participated in extensive **HTML coding** that implements web applications, prototypes, user interfaces, and websites for clients.
- * Developed the front-end web page by using **HTML5, CSS3, and JavaScript**.
- * Worked on responsive design and developed a single-page responsive website that could be served to desktop, Tablets, and mobile users using **ReactJS**.
- * Developed **CSS page layouts, navigations, and backgrounds** and presented designs and concepts to the clients and management for reviews.
- * Responsible for making responsive **web pages using Media Queries**.
- * Used **Mongo DB** along with **Node JS** as a database to store **JSON**.

Company: Banana Apps Ltd, Hyderabad, India

Client: The Hut Group
